# SPONSORSHIP OPPORTUNITIES

The Connection Is You

# WHO WE ARE

The Autism Society of Indiana was founded in 2007 with the belief that by creating connections, we empower everyone in the Autism community with the resources needed to live fully. Since then, we have supported over 2,500 individuals and their families by providing advocacy, resources, direct care services (like respite), support groups, training (like Autism 101), work readiness programs, and sensory-friendly events, all aimed at helping the autism community live fuller lives and build a bridge to needed services across the state.

Serving all 92 Indiana counties and broken into four geographical areas, we deliver services for children, teenagers and adults with Autism and those family members and caregivers who love and support them.

In 2025, we have served over 170 individuals and families in the Indiana Autism community. Our vision is to create a world where everyone in the Autism community is connected to the support they need, when they need it.

By becoming a sponsor, you play a critical role in making our vision a reality and supporting those who we serve through our mission. As a sponsor, you will have a unique opportunity to increase your visibility to a new audience while strengthening brand awareness with your existing one. We know with your sponsorship, ASI will continue to be a leader in Autism services as we look to empower individuals and help them realize their full potential.

# SPONSORSHIP LEVELS

The Autism Society promotes the active and informed involvement of family members and the individual with autism in the planning of individualized, appropriate services and supports. The Board of the Autism Society believes that each person with autism is a unique individual. Each family and individual with autism should have the right to learn about and then select, the options that they feel are most appropriate for the individual with autism. To the maximum extent possible, we believe that the decisions should be made by the individual with autism in collaboration with family, guardians, and caregivers.

Services should enhance and strengthen natural family and community supports for the individual with autism and the family whenever possible. The service option designed for an individual with autism should result in improved quality of life. Abusive treatment of any kind is not an option.

We firmly believe that no single type of program or service will fill the needs of every individual with autism and that each person should have access to support services. Selection of a program, service, or method of treatment should be on the basis of a full assessment of each person's abilities, needs, and interests. We believe that services should be outcome-based to insure that they meet the individualized needs of a person with autism.

With appropriate education, vocational training, and community living options and support systems, individuals with autism can lead dignified, productive lives in their communities and strive to reach their fullest potential.

The Autism Society believes that all individuals with autism have the right to access appropriate services and support based on their needs and desires.
